EDUCATION

Georgia State University

Atlanta, GA

Bachelor of Science in Computer Science; GPA: 3.92

Aug. 2022 – May 2026

- **Relevant Coursework:** Design & Analysis of Algorithms, Data Structures, Object-Oriented Programming, Operating Systems, Databases, Big Data Programming, Machine Learning

TECHNICAL SKILLS

Languages: Java, Python, TypeScript, JavaScript, SQL, Kotlin, Dart, Bash, HTML/CSS

Backend: Spring Boot, FastAPI, Node.js, Express, REST APIs, WebSockets, OAuth 2.0, JWT, Prisma, JUnit, Pytest

Frontend: React.js, Next.js, Angular, Flutter, Tailwind CSS

Distributed Systems: Microservices, Message Queues, BullMQ, Redis, Celery, Caching, Rate Limiting

Tools & Cloud: Docker, Kubernetes, Git, AWS (S3, EC2), GCP, CI/CD, Jira, Agile/Scrum

Databases: PostgreSQL, MySQL, MongoDB, PostGIS, Redis

EXPERIENCE

Sysco / Techwave | Data Engineering Intern – Houston, TX

June 2025 – Aug. 2025

- Engineered a **reusable data migration engine** in **Python** for Sysco's ERP-to-Workday transition, applying **object-oriented design patterns** and enterprise ETL practices that **cut future project timelines by 30%**
- Developed **validation scripts** that raised **record-match precision to 97%**, enforcing data consistency between legacy and modern systems through rigorous test coverage and defensive error handling

Georgia State University | STEM Tutor – Atlanta, GA

Aug. 2025 – Dec. 2025

- Led tutoring for Calculus I/II, Linear Algebra, and Probability & Statistics, supporting **15+ students weekly** and driving a **30% increase in average student grades** by translating complex technical concepts into clear, accessible explanations

PROJECTS

SwiftPaws | Python, FastAPI, PostgreSQL, Docker, WebSockets, JWT, Flutter

Jan. 2026 – May 2026

- Architected a **containerized backend** exposing **28+ REST endpoints** with **JWT role-based access control**, rate limiting, and a **WebSocket real-time dashboard**, applying **microservices and SOA principles**; validated by **101/101 passing tests**
- Engineered an **on-premises facial-recognition check-in service** (InsightFace, 512-dim embeddings, cosine similarity) achieving **sub-2s check-in** at campus events with **zero external API dependencies**
- Secured biometric data with **AES-128-CBC encryption** (Fernet) and consent-gated, **GDPR-compliant self-deletion**; shipped a cross-platform **Flutter client** with offline sync across **4 Agile sprints**

SpotandtrackK | Next.js, Node.js, TypeScript, Prisma, PostgreSQL, BullMQ, Redis, OAuth 2.0

Feb. 2026

- Built a **full-stack monitoring platform** that diffs Spotify playlist snapshots to detect track availability changes, using a **BullMQ + Redis job queue** with scheduled sweeps, exponential backoff, and **automatic rate-limit handling**
- Implemented **Spotify OAuth 2.0** with **AES-256-GCM** token encryption and a **distributed-lock refresh flow** preventing race conditions across concurrent jobs; enforced end-to-end **type safety** and schema validation across the stack

MoneySpeaks | Python, FastAPI, React, WebSockets, wav2vec2, Gemini, WebRTC VAD

Mar. 2026

- Created a **real-time scam-detection system** transcribing live calls and classifying risk through a **multi-stage streaming pipeline** with **under 2s end-to-end latency**
- Integrated **AI-vs-human voice detection** (wav2vec2) and behavioral analysis via Gemini, improving detection confidence by **35%** and cutting false negatives by **28%** with WebRTC VAD timing signals

CityTrotter | React, Vite, FastAPI, PostgreSQL/PostGIS, Mapbox GL, Gemini

Nov. 2025

- Developed an **urban-planning web tool** delivering instant impact analysis across **7 domains** (zoning, traffic, transit, schools, infrastructure, economics), backed by **geospatial queries** on PostGIS
- Integrated **Mapbox** visualization and **Gemini-generated** feasibility reports, reducing preliminary study time by **60%** and returning full analyses in **5–10 seconds**
